Course Assignments (C++ | Algo++ | Interview Prep)

Lectures

- Lecture videos are provided in every section.
- There are Quizzes, Assignments, Notes along with the Lecture videos in every section. You should attempt them all to master each section that you study.
- You should complete the lectures within the deadlines.
- Lecture videos will be available for the next 10 months from the date your course starts.

Challenges and Tests

- After every section, there will be a Challenges section.
- These challenges are mandatory for all. Passing score is 70% of the total points. Each question is of 100 points.
- Apart from these Challenges, there will be frequent tests analyzing your concepts and understanding.

Teaching Assistants and Doubt Resolution

- Apart from the mentors taking the course, there are teaching assistants in the course who will be taking your doubts.
- You can ask doubt on any content that you are facing problem at, be it a video or a question. There is an "Ask Doubt" button on the top right corner to raise your doubt.
- While Asking doubt
    - Give Proper title to your doubt and also provide your solution's link after saving at CB IDE (cb.lk/ide).
    - Mention where you are stuck in the code/ or what problem you are facing clearly.
- Your doubt will get resolved within 24 hours.
- If you have any further query or you are not satisfied with the doubt's solution you can reopen your doubt also, there is a "Reopen Doubt" button for that in Resolved doubts section.
- For doubt resolution TA support will be available on all seven days.
- You will get the TA support for next 6 months from the date your course starts.

Hint Videos

- For some Challenges problems, there are hint videos which you can watch. Watching them won't add any penalty.

Editorials and Test Cases

- You can see editorials also of any problem and can check the solution code. There is an "Unlock Editorial" button to open the editorial.
- You can download the test cases also for any problem. There is a "Download Testcases" button to download the test cases.
- But after unlocking the editorial or downloading test cases, further submissions to that question will not fetch you any marks.

Grading and Leaderboard

- All the Quizzes and assignments are graded.
- A Leaderboard is maintained for the batch which you can see under overview section in your course. Based on your score you can check your class rank.

Content Availability

- Lecture videos int the course will be accessible for the next ten months from the date your course get started.
- Quizzes and Challenges will be available to you for lifetime.

Community Support

- We have our discuss platform (cb.lk/discuss) for community support where students can help each other by solving their doubts, like and upvote relevant questions and answers.
- You will be having the access of discuss platform for lifetime.
- To explore it more you can visit cb.lk/discuss.

Certificate

- A Generate Certificate column is there which you can see under overview section in your course.
- After completion of 90% of your course, you can request for mentor's approval for your certificate.
- Verify your details before requesting your certificate's mentor approval.
- After mentor's approval you can get your certificate.

Endnote

- Ultimately, PRACTICE IS THE KEY TO SUCCESS!
- The more you practice, better will be the result. Also, avoid missing lectures.
- We wish all the best in this journey of learning. Happy Programming! :)
